

# Snowbird Mobile

## What you will need to make this project:

8½" x 11" white cardstock  
3 drinking straws  
Scissors  
Yarn  
Markers, glue and glitter (optional)

## Instructions

1. Print the snowbird pattern below onto the white cardstock.
2. Cut out the bird bodies and wings. Carefully cut the slit on each bird's body. You may need an adult to help you with this.
3. Insert a wing into each of the slits you just made so your birds look like figure 1.
4. Now you can put your mobile together. Take one of the straws and tie a piece of yarn tightly around the middle of it so that there is a long end for hanging. Make a loop at the top. See Figure 2.
5. To finish you will continue tying on yarn and straws to make a balanced mobile with the birds hanging at the ends of the yarn. Look at the picture below to see how to put it all together.
6. You can use the markers, glue and glitter to decorate your birds if you wish.
