

# How to draw a cupcake

1

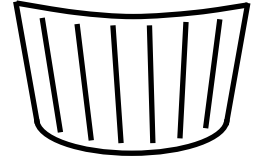

First draw two lines up and down as far apart as you want your cupcake to be wide. Make the lines closer at the bottom.

2

Add a curved line connecting the lines at the bottom and another connecting the top.

3

Draw some lines for the cupcake liner.

4

Ready to make some frosting? This frosting is made from smashed circle shapes. You don't even have to draw the whole shape—just the top. Squishy circles don't have to be perfect either.

5

Next the cherry on top. Just a circle with a curved line for the stem.

6

Do you want sprinkles? Add some short lines all over the frosting. You can decide how many you want.

7

Since this is a cute cupcake you'll need a face for your cupcake. Draw two circles and fill them in. Now add a smile.
